

Technical visits: 27 June 2019

Already booked

Technical visit 1: IFTS, Roger Ben Aim Center and a waste water treatment plant in Agen

IFTS, "Institut de la Filtration et des Techniques Séparatives", International Filter Testing Services is a non profit organization (Association Loi 1901) with membership, accredited (ISO 17025) and certified (ISO 9001) laboratory and research centre (labels SRC Research and Technology organization and CRT : Technical Ressources Centre) focusing on fluid filtration and separation science.

Roger Ben Aim Test Center, founded in 2018, is a unique test platform in Europe located along the Garonne river and close to the famous canal bridge just between a drinking water production plant and a domestic sewage treatment plant.
